Patient Information Leaflet

LucenceINSIGHT™ 12

covers 12 cancers for men

Turnaround Time:
(Working Days) **18**

LucenceINSIGHT™ 5

covers 5 cancers (in blue)

Nasopharyngeal cancer (EBV+)

Esophageal cancer

Thyroid cancer

Lung cancer

Liver cancer

Stomach cancer

Pancreatic cancer

Kidney cancer
(clear cell)

Gastrointestinal
stromal tumor (GIST)

Colorectal cancer

Bladder cancer

Prostate cancer

LucenceINSIGHT™ 12

covers 12 cancers for women

LucenceINSIGHT™ Women's 7

covers 7 cancers (in pink)

Nasopharyngeal cancer (EBV+)

Thyroid cancer

Breast cancer

Lung cancer

Liver cancer

Stomach cancer

Pancreatic cancer

Gastrointestinal
stromal tumor (GIST)

Colorectal cancer

Ovarian cancer

Cervical cancer
Endometrial cancer

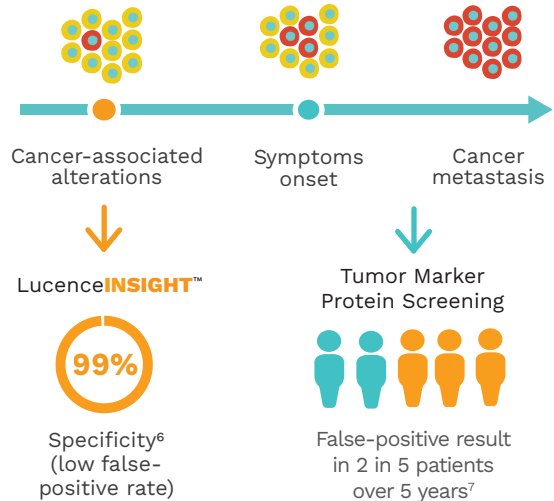

What is LucenceINSIGHT™ ?

- LucenceINSIGHT™ is a multi-cancer early detection (MCED) tool that screens for the circulating tumor DNA (ctDNA) of up to 50 cancers in one simple blood draw.

- LucenceINSIGHT™ screens for cancer with low false positives compared to tumor marker proteins.

- A report is generated in 12 or 18 working days.

Why should we screen for cancer?

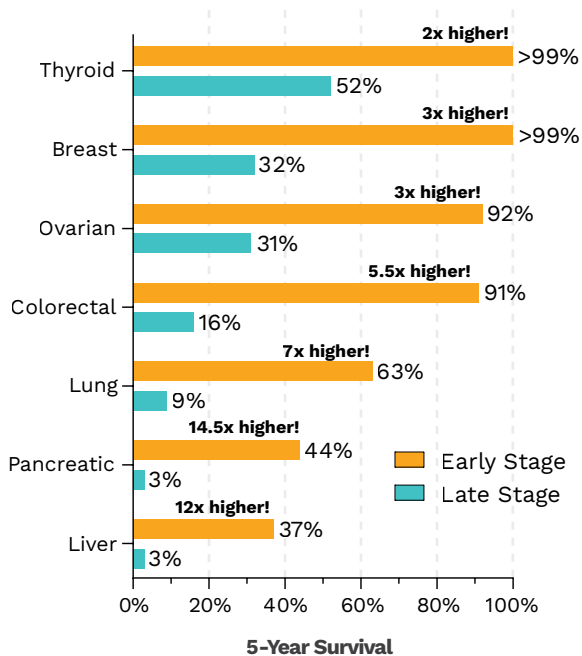

- Cancer is the number 1 killer.¹

- 4 in 5 cancer deaths are not covered by recommended screening.^{3,4}

- 5-year survival is higher with early detection.⁵

Who can benefit from LucenceINSIGHT™?

- LucenceINSIGHT™ is recommended for patients who:

- ✓ are aged 40+
- ✓ have elevated risk of cancer (family history, diet, lifestyle)

- The test is not recommended for patients who:

- ✗ are pregnant
- ✗ are in cancer remission for < 3 years
- ✗ had an allogenic bone transplant or a blood transfusion < 2 weeks prior to sample collection

- No fasting is needed. Refrain from heavy meals.

Case study⁸

EARLY DETECTION

A cancer signal was detected in a 60+ year-old asymptomatic patient.

ACTION TAKEN

PET-CT and colonoscopy confirmed early stage colorectal cancer.

The patient was treated and discharged.

Head & Neck

Nasopharyngeal cancer (EBV+)
Oropharyngeal cancer
 (HPV-positive; HPV-negative)
Laryngeal cancer
Salivary gland cancer

Eye cancer
 (Conjunctival melanoma;
 Uveal melanoma)

Esophageal cancer

Thyroid cancer

Non-Hodgkin lymphoma
 (Burkitt's lymphoma; Diffuse
 large B-cell lymphoma;
 Lymphoplasmacytic lymphoma)
Hairy cell leukemia

Acute myeloid leukemia (AML)
 (AML, NPM1-mutated; AML, other
 defined genetic alterations; AML,
 myelodysplasia-related)

Breast cancer

Mast cell tumor
Myeloproliferative neoplasm
Myeloma

Lung cancer
Lung neuroendocrine tumor

Bone cancer

Liver cancer

Stomach cancer
**Stomach neuroendocrine
 tumor**

Biliary tract cancer
 (Intrahepatic, Extrahepatic,
 Gallbladder)

**Gastrointestinal
 stromal tumor (GIST)**

Kidney cancer (clear cell)
Adult Wilms tumor

Adrenal gland cancer

Small intestine cancer

Pancreatic cancer

Cervical cancer
Endometrial cancer
Ovarian cancer
**Ovarian germ cell &
 stromal tumors**
Vulvar cancer

Colorectal cancer
**Colorectal neuroendocrine
 tumor**

Soft tissue cancer
 (Angiosarcoma;
 Smooth muscle sarcoma)

Bladder cancer
Penile cancer
Prostate cancer
Testicular cancer

Skin cancer
 (Melanoma; Non-melanoma)
